**Subject:** Aldicarb - Summary of conversation with Agent for AgLogic

**Importance:** High

Hi Marion and Shanta,

I wanted to let the two of you know that I had a brief conversation with Ann Tillman at the end of the day and wanted to provide you with a brief summary.

I told her the team is working very hard and there is a chance that we may have found a path forward, but that there are still a lot of moving pieces needed to fall into place. I also spoke to the notion that although we had the "loose" proposal in the February submission around the production cap and labeling that we would need something official proposed by AgLogic (but that I wanted to consult with the two of you and OGC for what that may need to be) -- So not to submit something tonight.....

I did ask if she could submit a sublabel for the citrus in FL (as indicated in the February submission). Additionally, although she also thought the 3 inch incorporation for the labeling was confirmed, she said she would reconfirm that restriction.

Based on Dan R.'s questions this morning, I asked if they had considered restricting the use by county in Florida (or if the labeling/use is only restricted by soil-type). She wasn't sure if that had been considered or not, but she would also check on that.

I told her that we would not be making the Dec. 14 PRIA due date, but that we are still working with the team on a time line and would get back to her on the new date in the next few days. I told her we were aware of the Florida committee time line and usage timelines.

I have a meeting with OGC tomorrow (9:30-10 am) as a beginning

Ex. 5 AC/DP

Ex. 5 AC/DP

Ex. 5 AC/DP

If you are available, that would be good if you could join, but this may be a learning session for me and may give me more homework to get up to speed.

I told her that I would be in contact again, soon, so if there are any essential items that I missed I can bring them up at that time.

Anyway, have a good night.

Debra
